

Northwest Territories – Mackenzie Mountains

Moose, Dall Sheep, Mountain Caribou and Mountain Goat

The hunting area is in the Mackenzie Mountains of the Northwest Territories. We hunt in a designated area which is 3,8 mill hectares. The mountains are approximately 1,000 to 3,000 m and terrain ranging from low rolling mountains to rugged peaks in the high mountains. The area is vast with many untouched areas.

Hunts are 10-days hunting and 2 days travel, horse, backpack, helicopter and riverboat trips for Dall Sheep from July 15th to mid-September in conjunction with Mountain Caribou, mountain Goat, Wolf and Wolverine from July 25th and Moose from September 1st.

Our partner had another great season, their 30th year in the Mackenzie Mountains, with many repeat clients.

The season started with good weather and good hunting. We had several bow hunters that were successful with both big Dall rams and Mountain Caribou. A client was up for his 3rd bow kill ram in as many years. The weather was cool and wet thru August and September, but it made for great hunting. Our partner were 100% on all our hunts, taking 7 rams over 40" with our best being 44 1/2 inches which was also a Fannin ram. An average of 37 1/2" with an 11 year old average says it all.

The Caribou hunters this year were also 100% both with bow and rifle. Took several that will score high in the record books. A hunter, took the full mixed bag hunt taking a Dall ram, Mountain Caribou, Moose, Goat and topped it off with a wolf.

The Moose hunts were 100% as well with very nice trophies. Our partner also guided for 2 very nice Mountain Goats both over 9" with heavy bases and exceptional capes.

Base camps have log cabins, tent frames, plywood cabins and showers. When out in spike camp there will be wall tents to sleep in. We

supply a guide for each hunter.

All hunts are one-on-one.

We arrange for the air charter to and from base camp and return to Norman Wells at the

conclusion of the hunt, on scheduled flight dates only.

You fly into Norman Wells and hunters are met at the airport in Norman Wells and flown by light aircraft to base camp which is 120 miles to the Southwest. Make sure you have your Birth Certificate or Passport when travelling.

Also make sure you have your Travel and Medical Insurance to cover your trip to Canada.

Helicopter is used when ever it is needed, moving hunters, hauling meat or supply's.

Prices:

10-days hunt for Alaskan-Yukon Moose
EUR 20.400,-
